

DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

Discover. Learn. Empower.

Experiment 3

Name: Ashish Kumar Singh

Branch: CSE

Semester: 6th

Subject: Java

UID: 22BCS17169

Section: IOT-631 /A

DOP: 13/02/2025

Subject Code: 22CSH-359

1. Aim: Calculate interest based on the type of the account and the status of the account holder. The rates of interest changes according to the amount (greater than or less than 1 crore), age of account holder (General or Senior citizen) and number of days if the type of account is FD or RD.

2. Objective: The objective is to calculate interest for an account based on its type (e.g., FD, RD, Savings) and the account holder's status (General or Senior Citizen). The interest rate varies depending on factors such as the account balance (greater than or less than 1 crore), the account holder's age, and the duration (number of days) for fixed or recurring deposits. The system dynamically determines the applicable interest rate and computes the interest accordingly.

3. Algorithm:

1. Input: Account type, account holder status (General/Senior Citizen), account balance, and duration (if FD/RD).
2. Check Account Type:
3. If Savings Account:
4. Use predefined interest rates based on balance (>1 crore or <1 crore) and status.
5. If FD/RD:
6. Use interest rates based on duration, balance (>1 crore or <1 crore), and status.
7. Determine Interest Rate:
8. Fetch the applicable rate from the rate table based on balance, status, and duration (if applicable).
9. Calculate Interest:
10. For Savings Account:
11. $\text{Interest} = \text{Balance} \times \text{Interest Rate} \times \text{Duration (in years)}$
12. $\text{Interest} = \text{Balance} \times \text{Interest Rate} \times \text{Duration (in years)}$
13. For FD/RD:
14. $\text{Interest} = \text{Principal} \times \text{Interest Rate} \times \text{Duration (in days)} / 365$
15. $\text{Interest} = \text{Principal} \times \text{Interest Rate} \times \text{Duration (in days)} / 365$
16. Output: Return the calculated interest.

Output:

```
Assignment3 [Java Application] C:\Users\SHIVAM\.p2\pool\plugins\org.eclipse.justj.open
Select the option:
1. Interest Calculator -SB
2. Interest Calculator -FD
3. Interest Calculator -RD
4. Exit
1
Enter the Average amount in your account:
10000
Interest gained: Rs. 400.0
Select the option:
1. Interest Calculator -SB
2. Interest Calculator -FD
3. Interest Calculator -RD
4. Exit
2
Enter the FD amount:
2000
Enter the number of days:
30
Enter your age:
21
Interest gained: Rs. 110.0
Select the option:
1. Interest Calculator -SB
2. Interest Calculator -FD
3. Interest Calculator -RD
4. Exit
```

COMPUTER SCIENCE & ENGINEERING

DEPARTMENT OF

Discover. Learn. Empower.

Learning Outcomes:

- **Object-Oriented Design:** Learn to create and use classes for real-world entities.
- **Core Programming Skills:** Practice loops, conditionals, and methods for inventory operations.
- **Data Structure Usage:** Use `ArrayList` to manage dynamic data effectively.
- **User-Friendly Systems:** Design intuitive interfaces and handle errors smoothly.
